### CUSTOMER SUPPORT ADVISER

JUNE 2016 - OCT 2017 | EBUYER.COM

After leaving education, I was employed first as a Customer Support Adviser at online technology retailer Ebuyer.com. My main responsibility was communicating with customers over the phone and through an online live chat service, solving issues relating to orders and returns and answering other general queries. Working in customer service allowed me to develop my interpersonal skills as I was tasked with making the customers' experience as positive as possible.

### WEB / GRAPHIC DESIGNER

OCT 2017 - NOV 2018 | EBUYER.COM

As a front-end web designer, I was primarily responsible for designing and coding a number of web pages, I also took on the role of graphic designer working across a range of disciplines including; designing for print, product design and branding.

As an online retailer, we worked with a number of high profile vendors including Microsoft, Intel and HP creating visual assets for large scale marketing campaigns.

My role consisted mainly of attending weekly meetings with the rest of the in-house marketing team and working independently and collaboratively on a number of design projects. Working in this way taught me a lot about organisation and time management as I was responsible for planning my own workflow and meeting deadlines.

*I'm passionate about creating unique and beautiful designs with my main focus being Logo design and branding. I aim to inject a sense of fun into everything I create. I also love to draw and tinker with web development.*
